

Amphibian Care and Welfare

25 June 2024

	10:00	Welcome and Introduction
	Session 1:	Setting the scene for amphibians used in research
	10:10	Use of amphibians in biomedical research
	10:40	Use of amphibians in biological and zoological research, for laboratories and field studies
	11:10	Comfort break
	Session 2:	What is amphibian welfare and how can you measure it?
	11:20	Poor welfare indicators and validation
	11:50	Using the 5 Domain framework to understand amphibian welfare
	12:20	Lunch
	Session 3: Husbandry and health	
	13:00	Development of husbandry guidelines to support amphibian welfare
,	13:00 13:30	Development of husbandry guidelines to support amphibian welfare eDNA for amphibian health monitoring
	13:30	eDNA for amphibian health monitoring Temperature effects of growth and development of Xenopus, what does
	13:30 14:00	eDNA for amphibian health monitoring Temperature effects of growth and development of Xenopus, what does this mean for care and amphibian welfare?
	13:30 14:00 14:30	eDNA for amphibian health monitoring Temperature effects of growth and development of Xenopus, what does this mean for care and amphibian welfare? Break
	13:30 14:00 14:30 15:00 15:30	eDNA for amphibian health monitoring Temperature effects of growth and development of Xenopus, what does this mean for care and amphibian welfare? Break Microbiome and amphibian health
	13:30 14:00 14:30 15:00 15:30	eDNA for amphibian health monitoring Temperature effects of growth and development of Xenopus, what does this mean for care and amphibian welfare? Break Microbiome and amphibian health Xenopus identification
	13:30 14:00 14:30 15:00 15:30 Session 4:	eDNA for amphibian health monitoring Temperature effects of growth and development of Xenopus, what does this mean for care and amphibian welfare? Break Microbiome and amphibian health Xenopus identification Working in collaboration
