

# Emeraid Mixes and Ratios

## What is Emeraid?

Emeraid is an emergency diet that can be used for a variety of species. Emeraid do four different types of diet:

- Omnivore
- Carnivore
- Herbivore
- Piscivore

Different diets can be mixed together to help meet the nutritional needs of an animal. Once opened, Emeraid should be kept in the fridge and used within 6 months.

## Which one is best for each species?

Emeraid Scoop Size	Small end = 1 tsp	Large end = 1 tbsp
Mix with	20ml water	60ml water

**Mixing Ratio = X number of scoops + 1 part water**

Water temperature: 39.5-40.5°C

		Number of scoops (X)				
	Species	Omnivore	Carnivore	Herbivore	Piscivore*	
<b>B I R D S</b>	Pigeon/Doves	6				
	Blackbirds, Robins, Thrushes	4.5	0.5			
	Sparrows	1.5	1.5			
	Finches, Siskin	6				
	Warblers		2			
	Woodpecker	3	1			
	Corvids	6				
	Kingfisher, Heron, Cormorant, Egret, Grebe				2	
	Mallard Duck	6				
	Swans, Geese	3		2		
	Gulls			2		
	Birds of Prey			2		
	Game Birds	4.5	0.5			
	<b>M A M M A L S</b>	Hedgehog	1.5	1.5		
		Fox		2		
Rabbit/Hare				4		
Rodents (e.g. rats, mice)		4.5	1.5			
Mustelids (e.g. weasel, stoats)			2			

\*When mixing Emeraid Piscivore it is necessary to add fish oil at a rate of 0.2ml per 20ml of water or 0.6ml per 60ml of water.

## How often should you feed?

Mammals and birds under 500g should be fed four times a day. Mammals and birds over 500g should be fed three times a day.

## How much per feed?

It is important to make sure that patients are stable before attempting to feed. Animals should be hydrated and at a normal body temperature before feeding.

	<b>First Feed (1% of BW)</b>	<b>Second Feed (2% of BW)</b>	<b>Third Feed (3% of BW)</b>
<b>50g</b>	0.5ml	1ml	1.5ml
<b>100g</b>	1ml	2ml	3ml
<b>150g</b>	1.5ml	3ml	4.5ml
<b>200g</b>	2ml	4ml	6ml
<b>250g</b>	2.5ml	5ml	7.5ml
<b>300g</b>	3ml	6ml	9ml
<b>350g</b>	3.5ml	7ml	10.5ml
<b>400g</b>	4ml	8ml	12ml
<b>450g</b>	4.5ml	9ml	13.5ml
<b>500g</b>	5ml	10ml	15ml
<b>1kg</b>	10ml	20ml	30ml
<b>2kg</b>	20ml	40ml	60ml
