

Turkey Standards Technical Advisory Group
Meeting Minutes I
12th June 2025

General discussions

The Group discussed the potential of adding standards on housing safety, including gas and monitoring. Litter quality and the importance of dustbathing was also raised. Concerns around beak trimming were highlighted, and associated factors which may play a role in reducing feather pecking and improving bird welfare, including use of the range and natural cover.

Standards development

The Group reviewed proposed standards amendments, including those on electrical testing, water quality, and environmental temperatures.

Turkey Standards Technical Advisory group
Meeting Minutes II
17th July 2025

Standards development

The Group continued review of proposed standards amendments, and topics discussed included ventilation and hot weather policies, medicine administration records, and methods of catching birds.
